

Hair and Body Shampoo w/Jeesperse® CPW-3 Formulation J7/75A LP

Waxes can now be added to cleansing formulations without heating due to the ability of JEESPERSE® CPW Wax Blends to disperse in cold water. These Wax Blends add a unique creaminess and lubricity to cleansing systems and also boost viscosity and stabilize foam. Deposition of the wax onto hair leaves it feeling silky and stronger.

Phase	Ingredients	INCI Nomenclature	Supplier	%
A	Di Water	Water		58.6
B	Glycerin 99	Glycerin	JEEN Int'l	3.0
B	Methocel E-4M	Hydroxymethyl Cellulose	Aqualon	0.6

Total				100.0

Procedure:

1. Add Phase A.
2. Pre-mix Phase B ingredients and add to the water and mix well until batch is totally clear, approximately 30 minutes.
3. Add in Phase C and mix well.
4. Add in Phase D ingredient slowly and mix well without aerating the batch. Mix until batch is smooth and uniform for at least 30 minutes
5. Add in Phase E and mix.
6. Add Phase F ingredient. Batch will thicken.
7. Add in Phase G. Mix for 20 minutes.

Specification:

pH: 5-6
