

Jeechem® CEO / Jeechem® CO Cetearyl Ethylhexanoate / Cetyl Ethylhexanoate

Jeechem® CEO and **Jeechem® CO** are clear emollient esters produced through the esterification of 2-Ethylhexanoic Acid and Cetearyl Alcohol. Their chemical structure makes them resistant to oxidation and degradation which contributes to their wide appeal in color cosmetics.

Their stability, purity, and clarity make them ideal ingredients and carriers for perfumes, fragrances, dry oil, sprays, and mists.

Jeechem® CEO and **Jeechem® CO** also have exceptional skin absorption characteristics making them preferred light feeling moisturizing agent, they go on the skin without leaving a heavy draggy feel. Both esters leave an elegant, soft, smooth, and velvety effect on the skin.

Jeechem® CEO and **Jeechem® CO** are compatible with most oil phase ingredients. They are soluble in most organic solvents such as alcohols, esters, ketones, mineral oils, natural fats, glycol ethers, aliphatic, aromatic, and chlorinated hydrocarbons. They are insoluble in water, glycerin, or low molecular weight diols and triols.

PRODUCT APPLICATIONS:

- Skincare creams, lotions, serums
- Sunscreens / Sunblocks
- Eye shadows and eye liners
- Mineral makeup
- Fragrance and perfumes
- Skin treatment products
- Lipsticks and lip glosses
- All pressed powders
- Foundations
- Mists and sprays

Typical Properties	
Appearance	Clear liquid
Odor	Mild, characteristic
Acid value	1.0 max.
Iodine value	1.0 max.
Flash point, °C	≥165

KEY BENEFITS:

- Good feeling, light emollient for skincare
- Strong resistance to oxidation and degradation, well suited for all color cosmetics
- Pure, clear, and stable ingredients for scented/perfumed finished products and fragrances
