

Jeechem® OO Oleyl Oleate

Jeechem® OO is a naturally-derived emollient ester of Oleyl Alcohol and Oleic Acid. Its unique lubricious oil-free properties make it ideal for a range of skin care, hair care, sun care, oil-free claim products, as well as color cosmetics and lipsticks.

Jeechem® OO may also be used as a versatile all-natural co-solubilizer in w/o and o/w emulsions helping to stabilize natural formulations, where it also improves penetration of emollients into the stratum corneum enhancing skin elasticity and suppleness.

In lipsticks and other color cosmetics, **Jeechem® OO** can be used as a co-wetting pigment dispersing agent, and an oil-free binder for pressed and loose powders. In lipsticks, it imparts slip, shine, and softness contributing to comfortable application and long wear.

Jeechem® OO is a naturally-derived and biodegradable ester making it ideal for natural formulations and cosmetics.

KEY BENEFITS:

- Excellent emollient for w/o and o/w emulsions and anhydrous systems
- Uniform color application
- Optimal play time
- No heavy residue
- Comfortable silky skin feel
- Reduces tack
- Skin conditioning
- Provides subtle shine in hair care products
- Light without being volatile

Typical Properties		
Appearance @ 25°C	Clear oily liquid	
Odor	Characteristic	
Acid value	1.0 max.	
Iodine value	80.0 - 100.0	
Saponification Value	100.0 - 112.0	
Specific Gravity @ 25°C	0.850 - 0.870
