

Jeasilc® 35C

Dimethicone (and) Dimethicone Crosspolymer-3

Jeasilc® 35C is a cyclized polydimethyl siloxane and part of our Jeasilc® product line of standard and specialty silicones. **Jeasilc® 35C** performs as a transparent, slick, tack-free lubrication silicone carrier. It is an especially useful additive in cream and stick foundations, producing a slick feel but without tack. When using proper emulsifiers, stable water in oil emulsions can be obtained. **Jeasilc® 35C** provides ease of application and enhanced softness in moisturizers, makeup applications and sun care formulations. **Jeasilc® 35C** may be used as is, or mixed with Dimethicone under high shear, to produce a soft, slick feel that is tack free.

KEY BENEFITS:

- Good spreadability
- Silky feel without tack
- Long lasting

PRODUCT APPLICATIONS:

- Creams/Lotions
- Foundations
- Make-up
- Skin Moisturizers
- Sun Care

Typical Properties	
Appearance @ 25°C	Colorless Transparent liquid
Odor	Odorless
Ionic Character	Nonionic
Non-Volatile Content (% by wt.)	100%
Specific Gravity	0.90 - 0.94
Recommended use levels	Hair care products: 0.5 - 2.0% Skin care products: 5 - 10% Body care products: 3 - 10% Color cosmetics: 8 - 15%
