

Jeesperse® CPW®-3
Cold Process Wax Technology
Polyethylene (and) Sodium Polyacrylate

Jeesperse® CPW-3 is a *patented** emulsifier in a simple to use free-flowing powder, specifically created to prepare a wide array of stable emulsions. Simply add **Jeesperse® CPW-3** to room temperature water and mix. When you add waxes to your cold process formulas, you will feel the difference as you create new textures and product forms.

Jeesperse® CPW-3 uses a mid-range molecular weight polyethylene that provides a creamy base to support all of your formulating ideas. By using **Jeesperse® CPW-3** in your formulations, you can develop hydrogels that can be used as the base for skin care and cosmetic products.

KEY BENEFITS:

- Improves stability
- Ease of use
- Hydrates quickly
- Offers enhanced textures
- Thickens and improves development of colors
- Cold Process Wax
- Amplifies the texture and feel of your product

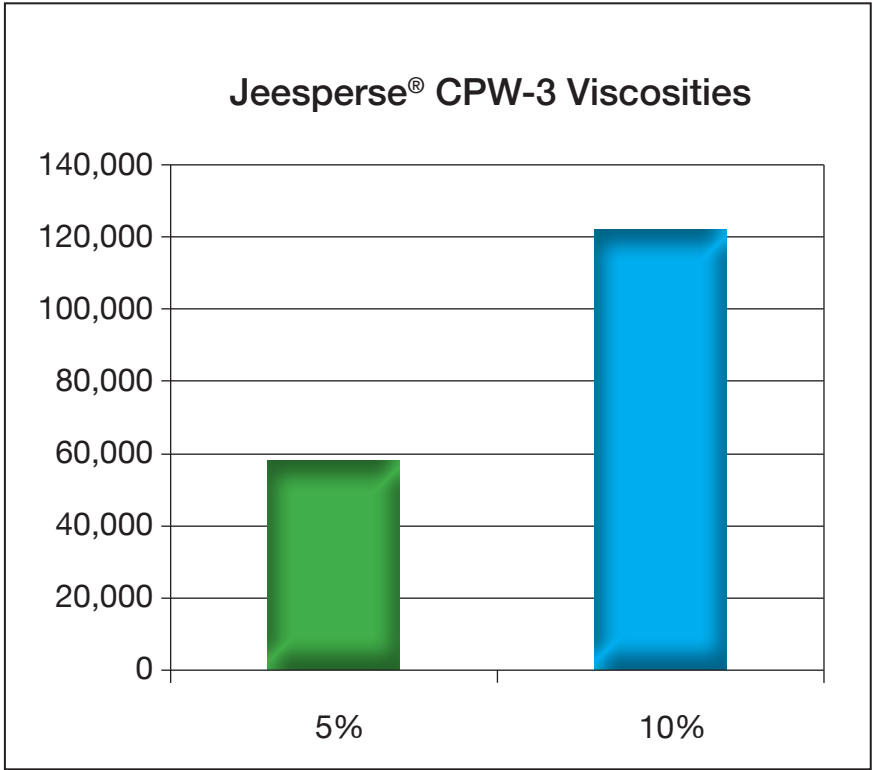

PRODUCT APPLICATIONS:

- All types of emulsions
- Color cosmetics
- Skin care products ranging from a lotion to a soufflé-like texture
- Hair care products

* US Patent No. 8,299,162 and patents pending

Typical Properties	
Appearance	Powder
Color	White to light tan
Melting point, °C	45.0 - 70.0
5% Aqueous Solution	Disperses
Recommended use levels	Hair care products: 0.5 - 2.0% Skin care products: 5.0 - 10.0% Body care products: 5.0 - 10.0% Color cosmetics: 5.0 - 10.0%
