No information available.

SECTION 5 – FIRE FIGHTING MEASURES

5.1 Extinguishing Media

Dry chemical, water spray, foam, carbon dioxide.

5.2 Flash point

460 °F (238 °C)

5.3 Fire Fighting Procedures

Wear self-contained breathing apparatus and other protective clothing. May float on water – treat as a grease fire. Water or foam may cause frothing when applied to flammable liquids having flash points above 212 °F (100 °C). The remark is included only as a precaution and does not mean that water or foam should not or could not be used in fighting fires in such liquids. The frothing may be quite violent and could endanger the life of the firefighter particularly when solid streams are directed into the hot burning liquid. On the other hand, water spray carefully applied has frequently been used with success in extinguishing such fires by causing the frothing to occur only on the surface and this foaming action blankets and extinguishes the fire. (NFPA 325m - 1984).

5.4 Unusual Fire and Explosion Hazards

If water must be used, use a fog nozzle to prevent spreading of burning liquid.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

6.1 Methods and Material for Containment and Cleaning Up:

Clean up with inert absorbent material and place into a separate waste container. Flush the area with warm water.

6.2 Reference to other Sections

Section 8: Exposure control /personal protection.
Section 13: Waste treatment.

SECTION 7 – HANDLING AND STORAGE
