SECTION 4 – FIRST AID MEASURES

4.1 Description of First Aid Measures

Oral: DO NOT INDUCE VOMITING. Get immediate medical attention.
Eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.
Skin: Wash with soap and water. Immediately remove contaminated clothing. Get medical attention if irritation persists. Launder contaminated clothing before reuse and discard shoes and other leather articles saturated with the material.
Inhalation: Remove exposed person to fresh air if adverse effects are observed. If breathing is labored, administer oxygen. If breathing has stopped, apply artificial respiration. If irritation persists or if toxic symptoms are observed, get medical attention.
Additional Info: If exposed or concerned. Get medical attention.
Physician: Treat symptomatically.

4.2 Most important Symptoms and Effects
No information available

4.3 Indication of any immediate Medical Attention and special Treatment needed
No information available.

SECTION 5 – FIRE FIGHTING MEASURES

5.1 Flash Point
26°C, 80°F Test method unavailable (Typical)

5.2 Extinguishing Media
CO2, dry chemical, foam. Water can be used to cool and protect exposed material.

5.3 Explosion Hazards
Toxic fumes, gases or vapors may evolve on burning. Vapors may be heavier than air and may travel along the ground to a distant ignition source and flash back. Container may rupture on heating

5.4 Fire Fighting Procedures
Wear full protective fire-gear including self-contained breathing apparatus operated in the positive pressure mode with full face piece, coat, pants, gloves, and boots. Use water spray. A solid stream of water may cause frothing and splattering.
SECTION 6 – ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, Protective Equipment and Emergency Procedures
May form explosive mixtures with air. Immediately evacuate all personnel from danger area. Personal Protective Equipment must be worn, see Personal Protection Section for PPE recommendations. Eliminate must be worn, see Personal Section for PPE recommendations.

6.2 Environmental Precautions
Prevent entry into sewers and waterways.

6.3 Methods and Material for Containment and Cleaning Up:
Eliminate all sources of heat, sparks pilot lights, static electricity and open flames. Ventilate spill area. Dispose of in accordance with all federal, state and local environment regulation. Pick up free liquid for recycle and/or disposal if can be accomplished safely with explosion proof equipment. Residual liquid can be absorbed on inert material. Check under Transportation and labeling (DOT/CERLA) and Other Regulatory Information Section (SARA) for hazardous substances to determine regulatory reporting requirements for spills.

6.4 Reference to other Sections
Section 8: Exposure control /personal protection.

SECTION 7 – HANDLING AND STORAGE

7.1 Maximum Pumping Temp.
Not determined

7.2 Maximum Handling Temp.
Not determined

7.3 Precautions for Safe Handling
Keep away from ignition sources such as heat, sparks and open flame. No smoking keep containers closed when not in use. Do not discharge into drains or the environment, dispose to an authorized waste collection point. Use appropriate containment to avoid environmental contamination. Avoid contact with skin or eyes. Avoid drinking, tasting, swallowing ingesting this product. Avoid inhalation of aerosol, mist, spray, fume or vapor. Avoid breathing dust, fume, gas, mist, vapors or spray. Ground / bond container and receiving equipment. Use explosion-proof equipment. Use only non-sparking tools. Wash thoroughly after handling. Launder contaminated clothing before re-use. Empty containers retain material residue. Do not cut, weld, braze, solder, drill, grind or expose
SAFTY DATA SHEET  
According to Regulation (EC) No 1907/2006 (REACH)

Revision Date: May 27, 2017  
Version No.: 2

containers to heat, flame, spark or other sources of ignition.

7.4 Condition for Safe Storage, including any Incompatibilities  
Do not store near potential sources of ignition. Isolated outside storage is preferred. Inside storage area should be in a flammable liquids cabinet or storage area. Store in a cool, dry, well-ventilated area. Keep container tightly closed. Do not store at temperatures greater than 120 deg F (49 deg C). Do not store in open, unlabeled, or mislabeled containers.

SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

81. Exposure Limits

<table>
<thead>
<tr>
<th>COMP.</th>
<th>OSHA</th>
<th>ACGIH</th>
<th>OTHER</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>TWA</td>
<td>STEL</td>
<td>TWA</td>

<td>N/E</td>
</tr>
<tr>
<td>METHANOL</td>
<td>200 PPM</td>
<td>N/E</td>
<td>200 PPM</td>
</tr>
</tbody>
</table>

8.2 Engineering Controls  
Use material in a well-ventilated area only. Additional ventilation or exhaust may be required to maintain air concentrations below recommended exposure limits. Use explosion proof equipment, Prevent inhalation by providing effective general and when necessary, local exhaust ventilation to draw spray, aerosol, fume, mist, or vapor away from workers.

Glove Protection  
Use nitrile or neoprene gloves.

Eye Protection  
Chemical goggles or face shield.

Respiratory Protection  
Use self-contained breathing apparatus for entry into confined space, for other poorly ventilated areas and for large spill clean-up sites. Consult with an industrial hygienist to determine the appropriate respiratory protection for your specific use of this material. A respiratory protection program compliant with all applicable regulations must be followed whenever workplace conditions require the use of a respirator.

Clothing Recommendation  
Gloves, coveralls, apron, boots as necessary to minimize contact. Wear either a chemical protective suit or apron when potential for contact with material exists. Use chemically protective boots when necessary to avoid contaminating shoes. Do not wear rings, watched or similar apparel that could entrap the material and cause a skin reaction launder contaminated clothing before reuse.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic Physical and Chemical Properties
Flash Point: 26 Deg. C, 80.1 Deg. F, Test method unavailable (Typical)
Upper Flammable Limit: Not determined.
Lower Flammable Limit: Not determined.
Autoignition Point: Not determined.
Explosion Data: Material does not have explosive properties in liquid state, but remains explosive mixtures with air.
Vapor Pressure: 40 mm Hg (20°C)
PH: 7.5-8.5 @ 10% in water
Specific Gravity: 1.01 (20 Deg. C)
Water Solubility: Soluble
Percent Solid: Not determined
Percent Volatile: 33% By Weight
Percent VOC: 13-15%
Vapor Density: Not determined
Evaporation Rate: Not determined
Odor: Alcohol
Appearance: Pale yellow liquid
Viscosity: Unknown
Odor Threshold: Unknown
Boiling Point: 78 Deg. C, 173 Deg. F (Typical)
Pour Point Temperature: Not determined
Freezing Point: Not determined
Note: The above data are typical values and do not constitute a specification. Vapor pressure data are calculated unless otherwise noted.

SECTION 10 – STABILITY AND REACTIVITY

10.1 Chemical Stability
Material is normally stable at moderately elevated temperatures and pressures.

10.2 Decomposition Temperature
Not determined

10.3 Incompatible Materials
Strong oxidizing agents and Acids.

10.4 Polymerization
Will not occur

10.5 Thermal Decomposition
Smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete combustion. Under combustion conditions, oxides of the following elements will be formed: sodium, sulfur. Imitating and toxic substances may be emitted upon combustion, burning or decomposition of dry solids.

10.6 Conditions to Avoid
Not determined

SECTION 11 - TOXICOLOGICAL INFORMATION

11.1 Acute Exposure
Oral Toxicity: The LD50 in rats is > 10,000 mg/Kg. Based on data from components or similar materials. Swallowing material may cause irritation of the gastrointestinal lining, nausea, vomiting, diarrhea and abdominal pain.
SAFTY DATA SHEET
According to Regulation (EC) No 1907/2006 (REACH)

Revision Date: May 27, 2017
Version No.: 2

Eye Irritation: Moderate to strong eye irritant. Based on data from components or similar materials. Vapors may cause irritation.

Skin Irritation: Skin irritant. Based on data from components or similar materials. Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying, and cracking of the skin.

Respiratory Irritation: Corrosive to the nose, throat and lungs. Based on data from components or similar materials.

Dermal Sensitization: No data available to indicate product or components may be a skin sensitizers.

Inhalation Sensitization: No data available to indicate product or components may be respiratory sensitizers.

11.2 Chronic Exposure

Chronic Toxicity: Ingestion of ethanol is known to cause liver damage and other chronic effects in humans. Inhalation testing using laboratory animals resulted in liver damage only at high concentrations.

Carcinogenicity: Evidence of the carcinogenicity of ethanol is confined to epidemiological studied assessing the impact of alcoholic beverages consumptions. The evidence does not indicate any such hazard exist from potential exposure to ethanol in the work place.

Mutagenicity: Product contains between 0.1% and 1% methanol. In-vitro tests on methanol indicate limited evidence of mutagenicity.

Reproductive Toxicity: No data available to indicate either product or components present at greater than 0.1% that may cause reproductive toxicity.

Teratogenicity: Product contains between 0.1% and 1% methanol. Methanol has been reported to cause birth defects in rats exposed to very high levels of vapor (20,000 ppm). Ethanol has been reported to cause birth defects in rats exposed to very high levels of capr (20,000 ppm). Ethanol has been reported to cause birth defects in laboratory animals.

11.3 Other Information

No other health hazards known.

SECTION 12 - ECOLOGICAL INFORMATION

12.1 Environmental Toxicity

Freshwater Fish Toxicity: The acute LC50 is 1-10 mg/L based on similar materials.

Freshwater Invertebrates Toxicity: The acute EC50 is 1-10 mg/L based on similar materials. Chronic effects expected at < 1 mg/L based on similar materials.

Algal Inhibition: Not determined

Saltwater Fish Toxicity: Not determined

Saltwater Invertebrates Toxicity: Not determined

Bacteria Toxicity: Not determined

Miscellaneous Toxicity: Not determined

12. Environmental Fate
SAFTY DATA SHEET
According to Regulation (EC) No 1907/2006 (REACH)

Revision Date: May 27, 2017

Biodegradation
This product will biodegrade moderately based on OECD 301-type test data for similar products.

Bioaccumulation
25% or greater of the components display no potential to bioconcentrate.

Soil Mobility
Not determined, has been derived from products of a similar structure and composition.

SECTION 13 - DISPOSAL CONSIDERATIONS

13.1 Waste Treatment Methods
This material, if discarded, is not a hazardous waste under RCRA Regulation 40 CFR 261. Material, if discarded, is expected to be hazard waste under RCRA due to ignitability (D001). Treatment, storage, transportation and disposal must be in accordance with applicable Federal, State/Provincial and Local regulations.

SECTION 15 – REGULATORY INFORMATION

U.S. TSCA Inventor:
All components of this material are on the US TSCA Inventory.

Other TSCA Reg.:
None known.

SARA Ext. Haz. Subst.:
This product does not contain greater than 1.0% of any chemical substance on the SARA Extremely Hazardous Substances list.

SARA Section 313:
This product does not contain greater than 1.0% (greater than 0.1% for carcinogenic substance) of any chemical substances listed under SARA Section 313.

SARA 311 Classifications:
| ACUTE HAZARD | YES |
| CHRONIC HAZARD | YES |
| FIRE HAZARD | YES |
| REACTIVITY HAZARD | NO |
| CERCLA Hazardous | |
Substances:

None known

Cal. Prop.65

This product does not contain intentionally contain any chemical(s) known to the state of California to cause cancer and/or birth defects based on maximum impurity levels of components: 0.020% 1,4 Dioxane, CAS no. 123-91-1

U.S. Fuel Registration

Not applicable.

Finnish Registration Number

Not registered.

Sweden Registration Number

Not registered.

Norway Registration Number

Not registered.

Danish Registration Number

Not registered.

Switzerland Bag T Registration Number

Not registered.

Italian Registration Number

Not Registered

Japan

All components are in compliance with the Chemical Substance Control Law of Japan.

EU

All components are in compliance with the EC Seventh amendment Directive 92/32/EEC.

Australia

All components are in compliance with the Chemical notification requirements in Australia.

New Zealand

All components are in compliance with the chemical notification requirements in New Zealand.

Canada

All components are in compliance with the Canadian Environmental Protection Act and are present on the Domestic Substances List.

Switzerland

All components are in compliance with the Environmentally Hazardous Substances Ordinance in Switzerland.

Korea

All components are in compliance in Korea.

Philippines

All components are in compliance with the Philippines Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990 (R.A. 6969).

China

All components of this product are listed on the Inventory of Existing Chemical Substances in China.
