SECTION 1 – IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

1.1 Product Identifier
Product Name

JEEPON 30-A POWDER

1.2 Relevant Identified Uses of the Substance or Mixture and Uses Advised Against
Identified uses
Cosmetic raw material

1.3 Details of the Supplier of the Safety Data Sheet
Company
JEEN International Corporation
24 Madison Road
Fairfield, New Jersey 07004
Tel: +1-973-439-1401
Fax: +1-973-439-1402
email: info@jeen.com
Website: www.jeen.com

1.4 Emergency telephone number
+1703-527-3887 (Chemtrec Int'l Tel - Collect calls accepted)

SECTION 2 – HAZARDS INGREDIENTS

2.1 Classification of the Substance or Mixture according to Regulation (EC) 1272/2008
Eye Irritant
Skin Irritant

2.2 Label Elements according to Regulation (EC) EU 1272/2008
Hazard pictogram
GHS07

Signal words
Warning
Hazard statements
H315: Causes skin irritation
H319: Causes serious eye irritation
Precautionary statements
P302 + P352: IF ON SKIN: Wash with plenty of soap and water
P280: Wear protective gloves/protective clothing/eye protection/face
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several
minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313 If eye irritation persists: Get medical advice/ attention.

2.3 Other Hazards
None known

SECTION 3 – COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances
-

3.2 Mixture
Chemical characterization
Cosmetic ingredients
SAFTY DATA SHEET
According to Regulation (EC) No 1907/2006 (REACH)

Revision Date: March 27, 2017                                       Version No.: 2

INCI      Sodium Methyl Cocoyl Taurate  Sodium Chloride
CAS       12765-39-8   7647-14-5
EC        263-174-9   231-598-3
Concentration  ≥70%    ≤18%

INCI      Coconut Fatty Acid  Water
CAS       -     7732-18-5
EC        -     231-791-2
Concentration  <3%     <3%

Hazardous Ingredients
Sodium Methyl Cocoyl Taurate  Classification acc. To Regulation (EC) No 1272/2008
Eye Irrit. 2    H319
Skin Irrit. 2   H315

SECTION 4 – FIRST AID MEASURES

4.1 Description of First Aid Measures
Eye contact: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Skin Contact: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Inhalation: Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if symptoms occur. If unconscious, place to recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion: Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if symptoms occur. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Fist-aiders: No action shall be taken involving any personal risk or without suitable training.

4.2 Most important Symptoms and Effects
No information available.

4.3 Indication of any immediate Medical Attention and special Treatment needed
No information available.
SECTION 5 – FIRE FIGHTING MEASURES

5.1 Flammability of Product
No specific hazard

5.2 Extinguishing Media
Use an extinguishing agent suitable for the surrounding fire

5.3 Unsuitable Extinguishing Media
None known

5.4 Protective equipment for fire-fighting
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, Protective Equipment and Emergency Procedures
Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.

6.2 Environmental Precautions
Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

6.3 Methods and Material for Containment and Cleaning Up:
If emergency personnel are unavailable, vacuum or carefully scoop up spilled material and place in an appropriate container for disposal by incineration. Avoid creating dusty conditions and prevent wind dispersal.

6.4 Reference to other Sections
Section 8: Exposure control /personal protection.

SECTION 7 – HANDLING AND STORAGE

7.1 Precautions for Safe Handling
Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored, and processed. Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes or on skin or clothing. Do not ingest. If during normal use that material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

7.2 Condition for Safe Storage, including any Incompatibilities
Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool, and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly
closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

81. Engineering Measures
No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosure, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

8.2 Hygiene Measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

8.3 Personal Protective Equipment

Respiratory
Use a properly fitted, particulate filter respirator complying with an approved standard if risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands
Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicated this necessary. 104 hour(s) (breakthrough time): Viton

Eyes
Safety eyewear complying with an approved standard should be used when a risk assessment indicated this is necessary to avoid exposure to liquid splashes, mists gases, or dusts
Recommended: Splash goggles

Skin
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Body: Recommended: safety apron.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic Physical and Chemical Properties
Physical State: Free Flowing White Powder
Flash Point: Closed cup: > 93.3°C (>199.9°F)
COLOR: White
Boiling Point: >100°C (>212°F)
Density: 1.11 g/cm³
Specific Gravity: >1
Volatile: 25% (v/v)

PH (4% Solution): 7.0-8.5

**SECTION 10 – STABILITY AND REACTIVITY**

N/A

**SECTION 11 - TOXICOLOGICAL INFORMATION**

11.1 **Acute Toxicity**
Conclusion/Summary: Mildly irritating to the eyes

11.2 **Chronic Toxicity**
Conclusion/Summary: Not available

11.3 **Irritation & Corrosion:**
Conclusion/Summary: Not available

11.4 **Sensitizer**
Conclusion/Summary: Not available

11.5 **Carcinogenicity**
Conclusion/Summary: Not available

11.6 **Mutagenicity**
Conclusion/Summary: Not available

11.7 **Teratogenicity**
Conclusion/Summary: Not available

11.8 **Reproductive Toxicity**
Conclusion/Summary: Not available

**SECTION 12 - ECOLOGICAL INFORMATION**

12.1 **Aquatic Ecotoxicity**
Conclusion/Summary: Not available

12.2 **Persistence/Degradability**
Conclusion/Summary: Not available

12.3 **Toxicity of the Products of Biodegradation**
The product itself and its products of degradation are not toxic.

**SECTION 13 - DISPOSAL CONSIDERATIONS**
13.1 Waste Treatment Methods

The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements. The information presented below only applies to the material as supplied. The identification based on characteristics or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.
