

## **Jeesperse® CPW®-CG-T**

### **Cold Process Wax Technology**

Cetyl Alcohol (and) Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer  
(and) Glyceryl Stearate (and) Caprylic/Capric Triglyceride

**Jeesperse® CPW-CG-T** is a *patented and patents pending\** emulsifier in a simple to use free-flowing powder, specifically created to prepare a wide array of stable emulsions. This unique emulsifier will mix with cold water to create stable emulsions. This Cold Process Wax will simultaneously thicken oil and water phases.

**Jeesperse® CPW-CG-T** uses an acrylate copolymer that allows for greater tolerance to pH extremes. Using this product will aid in film forming, substantivity, conditioning properties and aid in emulsion stability. Create low viscosity or high viscosity emulsions with this unique product. Elevate your emulsions resulting in a synergy you can see and feel.

#### **KEY BENEFITS:**

- Improves stability
- Hydrates quickly
- Enhances textures
- Thickens and improves development of colors
- Cold Process Wax
- Enhances the texture and feel of your product
- Water-dispersible emulsifying wax

#### **ADDITIONAL BENEFITS:**

- Allows you to incorporate without heat, using one vessel. Then add water, then add **Jeesperse® CPW-CG-T**, and then mix. Then add the oil and water phases.

\* US Patent No. 8,299,162 and patents pending

Typical Properties	
INCI Name	Cetyl Alcohol (and) Sodium Acrylate/Sodium Acryloyl Dimethyl Taurate Copolymer (and) Glyceryl Stearate (and) Caprylic/Capric Triglyceride
Appearance at 25°C	White powder
Melting point, °C	38 - 48
Recommended use levels	0.1 - 10%

#### PRODUCT APPLICATIONS:

- All types of emulsions
- Color cosmetics
- Skin care, from a sprayable lotion to a soufflé-like texture
- Depilatories
- Self-tanner/DHA
- Salicylic acid and glycolic acid preparations
