

Aloe Vera Gel C

Aloe Barbadensis Leaf Juice (and) Triethanolamine (and) Carbomer

Aloe Vera Gel C is a high quality, pure natural Aloe Vera Gel which has been thickened with Carbomer, allowing for the simple addition of alcohol to create a quick and effective hand sanitizer. The benefit of Aloe Vera Gel is to lessen the harsh drying effects of hand sanitizers.

Aloe vera gel is harvested from the inner filets of the aloe leaves, yielding a thick, soothing and cooling product. Aloe vera is a pure natural product and has been historically used to soothe inflamed skin. It has an abundance of natural anti-inflammatory, soothing, cooling, and calming properties that can help mitigate redness and pain resulting from excessive sun exposure. Aloe vera provides an amazing number of vitamins and minerals that help reduce inflammation and fight free radical damage. Some of these include Vitamin A, Vitamin C, and Vitamin E. Bradykinase, also present in aloe vera, helps reduce excessive inflammation when applied to the skin topically.

KEY BENEFITS:

- Cooling and calming properties
- Reduces inflammation and redness
- Anti-inflammatory properties
- Anti-oxidant properties

PRODUCT APPLICATIONS:

- Hand sanitizers
- Sun care products
- Skin creams and lotions
- After sun products
- Shampoos & conditioners
- Facial moisturizers
- Skin cleansers
- Shaving/Depilatory preparations

Typical Properties	
Appearance	Clear Gel with Possible Slight Yellow Tint
Color (Gardner)	1 Maximum
Odor	Odorless
pH Value	6.50 – 7.75
Identification By FT-IR	Spectral Comparison
Viscometer Reading @ 25°C, 4 @ 50 RPM	10 – 25
Specific Gravity @ 25°C	1.00 – 1.02
Recommended use levels	<div style="text-align: right; padding-right: 20px;"> hair care 5.0 – 80.0% skin care 5.0 – 80.0% body care 5.0 – 80.0% color cosmetics 5.0 – 80.0% </div>
